

Indiana Furniture

Square One is the simple way to provide space division, functionality, and architectural design in your working environments. With individual building blocks that securely connect and reconfigure, and accessories like barn doors, planter boxes, acrylic and acoustical inserts, and dry-erase boards, your personalization of Square One is limited only to imagination. Made of solid wood, Square One provides a sustainable material while bringing warmth and beauty to any space.

Loftwall

Parallel is everything traditional desk dividers are not. Parallel is acoustic, tackable, writable, repositionable, and sustainable. With panels manufactured from recycled water and soda bottles, Parallel breathes new life into old waste. Utilizing magnetic technology, Parallel provides a one-of-a-kind, dynamic user experience. Down to the hardware, which allows for easy cable management and device organization, every detail of Parallel has been meticulously designed.

Luum

Exploring fiber, structure, and process, the **Mutable Matter Collection** consists of five textiles by Suzanne Tick that transform renewable and recycled fibers into new surfaces with energy and texture. Luum's design process begins at the fiber level with environmental preservation at the forefront. Mutable Matter exemplifies design-driven, high-performance textiles that are environmentally responsible and renewable. This includes wool, cotton, and pre- and post-consumer recycled polyester, diverting material from waste streams.

Landscape Forms

Harvest table and bench tops are made of 100 percent post-consumer HDPE recycled plastic, keeping thousands of milk jugs from landfills. The HDPE surface won't get too hot or cold and requires low-to-no maintenance. The metal structure is finished with powder coating that's free of lead, hazardous air pollutants, and volatile organic compounds. Harvest is manufactured with nearly zero waste, and, at the end of its life, it can be completely recycled.

Louis Poulsen

Designed by Olafur Eliasson, the complex shapes of the **OE Quasi** combine geometry and light. The pendant is composed of two contrasting yet interlinked geometric shapes. The OE Quasi has been created with sustainability in mind, a core value of Eliasson's work. The aluminum used is 90 percent recycled, while the other materials are entirely recyclable.
